

Key Project Details

Installation Date:

July 2021

Property Type:

Retrofit

Product Installed:

9kW Bosch Compress

Distribution System:

Radiators

Energy Savings:

£45 per month

Alto Energy Approved Installer decided to switch from a gas boiler to an air source heat pump from Worcester Bosch.

"Ditch gas for a cleaner energy". That was the plan for one of Alto Energy's recommended installation partners, Craig Cutler, who did just that by installing a heat pump in his own home. Craig replaced a gas combi boiler with the new Worcester Bosch Compress air source heat pump, distributed via radiators throughout the whole house. He is now saving around £45 per month on fuel bills.

Craig always wanted a heat pump and loved the idea of having a heat pump in his own home. Having fitted countless heat pumps through the Alto Energy MCS Umbrella Scheme, it made perfect sense for him to install one for himself.

Alto Energy are an official Bosch distributor and are the exclusive provider of the Bosch MCS Umbrella. Bosch launched their brand new heat pump in 2021 and it is proving to be a popular unit. The Bosch air source heat pump is a new generation of heat pump that sets new standards in terms of efficiency.

Customer Q & A

What benefits do you feel your heat pump system has afforded you?

"Cost saving and house feeling more comfortable in general."

What made you choose Alto Energy to provide your system?

"Knowledge in the team and friendly staff."

Would you recommend Alto Energy to others?

"Yes, easy to deal with and very knowledgeable."
